## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Sarfarazi (WO 00/61036). In reference to Figures 13 and 14 Sarfaraz discloses an intraocular lens system comprising an optic (66) composed of a resilient, shape-retaining synthetic material (page 16, lines 8-11), a optic positioning member (68, 70) wherein the optic positioning system is responsive to ciliary body movement and the optic positioning member comprises an anterior and posterior wherein the optic is connected to the positioning member in a location central to the anterior and posterior segments and the optic is located between the anterior and posterior segments.
4. The lens system of Sarfaraz further comprises a plurality of circumferentially spaced-apart haptic arms (70) and a plurality of circumferentially spaced-apart, arcuate in cross-section, positioning legs, wherein the legs are joined with the optic via the haptic arms at a bight. See Figure 14.
